

Powder Emulsifier BR 6150

● **Composition**

Emulsifier BR 6150 is a fatty alcohol ethoxylate .

● **Description**

Emulsifier BR 6150 has a very strong hydrophilic (water soluble) character.

● **Typical Properties**

Appearance	white powder at 20°C
Particle size	100% <1000 microns
pH	5-7 (1% in water)
Water content	max 1%
Flash point	>100°C
Active content	100%
Melting point	52°C

The solubility of 5% Berol 05 P is as follows:

Ethanol	soluble
Water	soluble

Hazard Classification

The following information: hazardous substances ordinance and transportation ordinance classification and labeling storage and handling protection measures the toxicity and ecological effects of measures in case of accident and fire can be found in our safety data manual.

Use the Information

For safe use, please read the product information and product safety data sheet and packaging label, as well as any physiological and health hazard information
