

Dispersant BR 2187

● Composition

Phosphinocarboxylic acid.

● Introduction

One single product for calcium carbonate, barium sulfate, silicate and iron oxide dispersancy.

● Specifications

pH	3.5 - 4.5
Solid content	47 - 53 %
Viscosity	150 - 600 cps

Characteristics

Appearance	Liquid
Color	Colorless
Solubility	Solubility in water Completely

Suggestions

It has to be neutralized with an amine before it can be used

● Notice for use

For safe use, please read the product information and product safety data sheet and packaging label before use, as well as any raw materials Scientific and health hazard information

● Storage

The products should be stored in a cool, dry and ventilated warehouse under closed conditions. The recommended storage temperature is 5~35°C.

Validity period: 24 months (under specified storage and transportation conditions)

Package

25kg/drum、200 kg/drum
