

## Thickener AK HASE 3344

Thickener AK HASE 3344 is an associative alkali soluble viscosifier. It is supplied as a stable, ready-to-use anionic latex emulsion.

Thickener AK HASE 3344 was developed for use in water based paints and coatings. It's high shear characteristics make it an ideal choice where good leveling and anti-splatter are desirable. This product can be added both to the pigment grind and as a final rheology modifier in the manufacture of paints and coatings. It imparts good viscosity stability over time when compared to other offerings.
